

Remote CAD / Drafting Services

Do you need scaffold plans made, but don't have a draftsman?
Looking at outsourcing the drawings for some extra work?
After trustworthy, experienced remote CAD technicians to take on a complex project?

Our team is trained, experienced and ready to go! No need to worry about additional software licences or losing control of your own files & intellectual property: We have a comprehensive library of 3D **Layher, Cuplok, ATPAC, Kwikstage** & more scaffold blocks to model even the most complex designs, and are able to generate high quality 3D perspective views to improve the impact and clarity of your designs. As part of the design process, we are also able to generate preliminary Bills of Materials.

We have worked on major projects around Australia, including but not limited to: Storage Tanks, Chimneys, Motorway Overpasses, Pipelines, Rail Bridges, Train Stations, Theatres, Shopping Centres, Hospitals, High-Rise Apartment & Commercial Buildings, Residential Buildings, Waste Treatment and Industrial Facilities.

Whatever you need documentation for, our dedicated modelling & drafting team have got you covered:

Perimeter Scaffold, Birdcages, Handrail Formwork Support, Demolition Scaffold

Stretcher & Construction Stairs, Ladder Access Bays, Scaffold Ramps, Public Access

Loading Bays, Rostrums, False-floors, Void Scaffold, Tank & Storm Water Shaft Scaffold

Lift Shaft Scaffold, Hanging / Suspended Scaffold, Demolition Screens, Bridges & Cantilevered Access, Covered Scaffold Walkways & **Gantries**
MKII Soldier **Support Towers**, Wall-mounted Supports & Walkways
